

Simplifying Federal Records Management with Secure, AI-Driven Robotic Digitization

Federal agencies are facing an urgent need to modernize their records management processes in response to federal government actions and evolving compliance requirements. Many agencies are left with the burden of handling massive volumes of high-value, mission-critical records — much of which remain in paper form — making accessibility, security, and compliance a growing challenge. Without a structured, automated solution, agencies risk inefficiencies, increased costs, and non-compliance.

Core Competencies

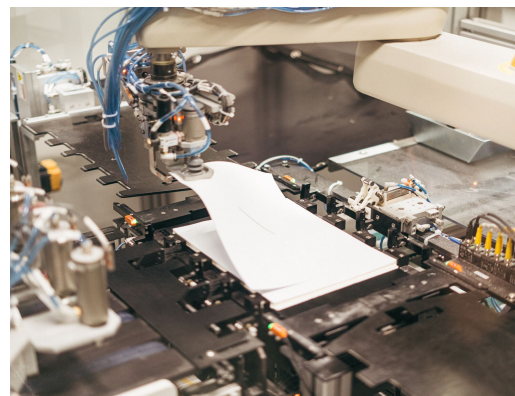

VASTEC delivers a turnkey managed service for records modernization, helping federal agencies efficiently digitize, manage, and access critical records while maintaining operational continuity and staying within budget.

- **Fully Managed Service:** A turnkey solution with minimal agency involvement. Our cleared, expert team handles on-site inventory, including locating, identifying, manifesting, packing, transporting, and storing boxes until documents are digitized.
- **Effortless Access:** Seamlessly integrates with existing records systems for quick, hassle-free retrieval of critical information.
- **Compliance & Security:** Full chain of custody tracking and compliance with NARA, HIPAA, RMF, and FISMA safeguards sensitive records. Authority to Operate (ATO) secure systems and processes meet federal security requirements across agencies.
- **Comprehensive Media Handling:** Securely scan paper, microform, blueprints, schematics, maps, x-rays, audio/visual content, photographs, and bound materials.
- **Section 508 Expertise:** A leader in Accessibility and Section 508 compliance with VASTEC Verified® Certification.

Differentiators

VASTEC, powered by Ripcord, provides a cutting-edge platform that helps federal agencies accelerate digital transformation with cost-effective, scalable solutions that are easy to implement.

- **AI-Powered Robotics:** Automation and digital twin technology streamline digitization, reducing manual handling and enhancing accuracy. Developed from NASA research, our robotics rapidly process large volumes of paper documents with precision and scale.
- **Optimized Cost Efficiency:** Intelligent workflows eliminate inefficiencies, speeding access to critical records while reducing costs.
- **Transparent Pricing:** Simple, easy-to-understand per image or per box solution pricing aligns with agency budgets.

Past Performance

Our trusted team has proven experience providing solutions for various federal agencies, including:

- Defense Health Agency (DHA)
- Defense Logistics Agency (DLA)
- Department of Homeland Security (DHS)
- Department of Justice (DOJ)
- Department of Transportation (DOT)
- Department of Treasury (TREAS)
- Federal Deposit Insurance Corporation (FDIC)
- National Archives & Records Administration (NARA)
- Social Security Administration (SSA)
- U.S. Patent & Trademark Office (USPTO)
